- If you are a teacher of a tutor group and you are going to take children to a study trip, where would you take them to? Why?
- 1. A science museum;
- 2. A local farm; or
- 3. A theater performance.
- Give detailed information to support your answer and explain why.
- 如果你是小組輔導的老師，而你要帶小孩進行一趟教學之旅，你想帶他們去哪裡？為什麼？
- 1. 科學博物館；
- 2. 當地的農場；
- 3. 戲劇演出。
- 給出詳細的資訊來支持你的答案，並解釋為什麼。

WordGod English

高分範例：

Personally speaking, I think taking children to a local farm will be the best because this will help them understand something so basic that we ignore. That is, food production. Although students can also learn new knowledge in a science museum or during a theater performance, it can be learned in classroom environment. In contrast, kids can't realize how hard it is grow plants and rear animals until they set foot on a farm. For instance, if students try to collect eggs, milk cows, or pick up weeds, they will find that none of them are easy jobs. They will learn to respect farmers and cherish the food they have. That's why I will choose a local farm.

中文翻譯：

就我個人而言，我認為帶小孩到當地的農場最好，因為這將幫他們了解一件基本到我們忽略的事，那就是食物生產。雖然學生也可以在科學博物館中或戲劇演出中學到新的知識，但這可以在教室環境下學到。相對地，還未踏上農場前，小孩不會了解種植植物和飼養動物有多辛苦。舉例來說，如果學生試著撿雞蛋、擠牛奶或拔雜草，他們將發現以上都不是輕鬆的工作。他們將學會尊重農夫，珍惜他們擁有的食物。這是為何我選擇當地農場。

- Do you agree or disagree with the following statement?
- In a math class, it is less important to teach young people to think in mind because technologies like computer will help them do so.
- 你同不同意下面這句話？
- 在數學課上教學生心算不是很重要，因為電腦這樣的科技將會幫他們算。

WordGod English

高分範例：

In my opinion, I think there is a need for students to learn mental calculation because technologies are not always available. Some people may argue that computers, smart phones, or calculators can help us calculate, but we never know when we have to count on ourselves. For instance, if you go to a traditional grocery and the owner only has a calculator which happens to break down, what should you do? Ok, you can use your cellphone but the moment you take it out, you find that your battery has died. So to check out, you still need to calculate the total without any help of technologies. This is why I believe teaching young people to think in mind is necessary.

中文翻譯：

就我的想法，我認為有必要讓學生學心算，因為科技並不總是可得。有些人可能會說電腦、智慧型手機或計算機可以幫我們計算，但我們永遠不會知道哪個時候我們靠自己。舉例來說，如果你去一間傳統的雜貨店，店主唯一一台計算機剛好壞了，你要怎麼辦？好，你可以用自己的手機，但你把手機拿出來的瞬間，才發現手機沒電了。所以為了結帳，你還是需要計算總價，而沒任何科技的輔助。這是為什麼我認為教年輕人心算有其必要。
